

Making Worksheets, Tests, Etc. Accessible for All

Claro PDF & ReadIris

Step 1: Download both applications from the App Store (search for ClaroPDF and ReadIris).

Step 2: Once both applications are on your iPad/Device, they are ready to go!

Step 3: Open up ReadIris

Step 4: Take a picture of the worksheet (you will have to allow ReadIris access to your iPad camera) by clicking on the plus document, then selecting “take picture.”

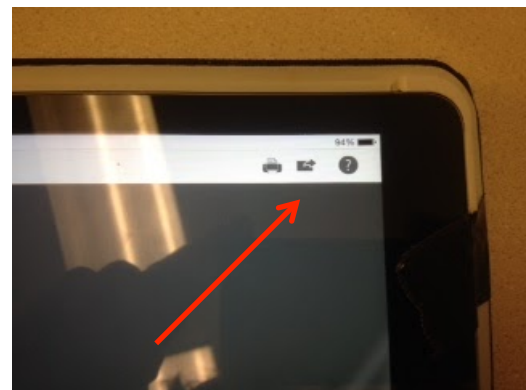

- It works best to take the picture of the sheet on a solid backdrop so the camera can identify the worksheet easily
- Once a photo is taken, it will then try and find the borders of the paper. You can adjust the border to make sure it covers the entire page, fine tuning with the buttons on the bottom to crop, rotate, or tilt (see image).
- Press the right arrow in top right, selecting A4 for 8.5x11 paper

Step 5: Once you have a good picture, you need to “open it in another application,” meaning open with Claro PDF

Step 6: Select Claro PDF from your options

Step 7: Student can interact with .pdf within Claro by:

- Using iPad Keyboard
- Siri, by selecting the microphone
- Using the “draw” option to circle, underline, highlight, etc.

For a step by step video demonstration of these applications, visit:
